

SMART FLOOR PROJECTOR SCREEN **PAINT - WHITE**

APPLICATION GUIDE

Smart Floor Projector Screen Paint - White can be applied over existing floor paint, or onto bare concrete. It is possible to make it Anti Slip Floor Paint, by adding a fine aggregate to the paint while it's still wet.

SUITABLE FOR APPLICATION

- Any concrete floor subject to light-medium use.
- Can also be applied to wood and metal.

The maximum dimensions this paint will cover is specified on the container.

All products within the Smarter Surfaces Projection Range have been performance certified on gypsum board with a Surface Finish Quality Standard of US 5/ EU Q4 guaranteeing a high performance smooth, seamless surface ready for use with a high-quality projector for professional projection results.

HOW TO APPLY SMART FLOOR PROJECTOR SCREEN PAINT - WHITE

1

PREPARE THE SURFACE

For new concrete and power floated concrete prepare using an Acid etch solution to
For application over an existing floor paint. Remove any flaking or poorly bonded paint using a floor scraper. Gloss paint should be lightly sanded to provide a key.
Make sure the surface is clean and dust free

2

REPAIR

Holes or cracks can be repaired with concrete repair compound and allow to dry

3

APPLICATION

The surface must be dry and clean
Stir the paint thoroughly.
If you require an Anti Slip Floor Paint, add aggregate to the paint and stir well
Apply using a short pile lint free roller.
Use the roller to work the paint into the surface of bare concrete.
A brush can be used for cutting in around the edges.
Once the first coat is applied wait 10 hours before applying the second coat

4

LIMITATIONS

Avoid applying in cold (below 15°C) conditions.

5

CLEANING

Post application once the floor paint is fully cured use a pH neutral standard floor detergent for cleaning as required. For cleaning equipment and tools during application use water. We do not recommend diluting the floor paint.

6

DRYING TIME

Smart Floor Projector Screen Paint will be usable after 24 hours.
